**Product Description:** Fibrinogen (factor I) is a glycoprotein found in the blood of vertebrates. It is directly involved in the complex process of blood clotting. This fibrinogen has been depleted of plasminogen using affinity chromatography.

### Special Instructions:

- Briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid trapped in the container's cap during shipping.
- Fibrinogen should be thawed in a 37°C using a water bath then aliquoted into single use vials that are stored at < -70°C.
